

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, September 15, 2014 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (44 new fires)  
 New large fires: 6 (\*)  
 Large fires contained: 2  
 Uncontained large fires: \*\* 15  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 2  
 Type 2 IMTs committed: 7

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Northern California Area (PL 3)**

New fires: 2  
 New large fires: 2  
 Uncontained large fires: 8  
 Type 1 IMTs committed: 2  
 Type 2 IMTs committed: 1

\* **King**, Amador-El Dorado Unit, Cal Fire. IMT 1 (Giachino). Eleven miles east of Placerville, CA. Timber and grass. Active fire behavior with long-range spotting. Numerous residences and energy infrastructure threatened. Evacuations in effect.

\* **Black**, Mendocino Unit, Cal Fire. Eight miles north of Ukiah, CA. Chaparral. Moderate fire behavior.

**Happy Camp Complex**, Klamath NF. IMT 1 (Opliger). One mile east of Happy Camp, CA. Timber, brush and grass. Active fire behavior with group torching, crown runs and long-range spotting. Numerous structures threatened. Evacuations, road and area closures in effect.

**Dog Bar**, Nevada-Yuba-Placer Unit, Cal Fire. Six miles south of Grass Valley, CA. Timber. Minimal fire behavior. Evacuations have been lifted. Increase in acreage due to more accurate mapping.

**Bald Hill 3**, Hoopa Valley Tribe, BIA. IMT 2 (Minton). One mile northwest of Hoopa, CA. Timber. Creeping and smoldering. Reduction in acreage due to more accurate mapping.

**Gulch**, Shasta-Trinity Unit, Cal Fire. Eight miles north of Bella Vista, CA. Chaparral. Minimal fire behavior.

**July Complex** (2 fires), Klamath NF. Four miles east of Sawyers Bar, CA. Timber, brush and grass. Moderate fire behavior. Area closure in effect.

New fires: 10  
New large fires: 3  
Uncontained large fires: 5  
Type 2 IMTs committed: 4

\* **36 Pit**, Mt. Hood NF. IMT 2 (Rabe). Ten miles southeast of Estacada, OR. Timber. Structures threatened. No further information received.

\* **Onion Mountain**, Rogue River-Siskiyou NF. IMT 2 (Williams). Fifteen miles west of Grants Pass, OR. Timber. Extreme fire behavior with group torching and spotting. Structures threatened.

**Deception Complex**, Willamette NF. IMT 2 (Watts). Two miles west of Oakridge, OR. Timber. Moderate fire behavior with isolated interior torching. Numerous residences threatened. Road and area closures in effect.

**790**, Rogue River-Siskiyou NF. IMT 2 (D. Johnson). Thirty miles northeast of Medford, OR. Timber. Creeping and smoldering with isolated torching. Area closures in effect.

\* **Fork Peak**, Pacific Cascade Region, DNR. Twenty-six miles southwest of Centralia, WA. Timber and logging slash. Active fire behavior with torching and spotting.

**Freezeout Ridge**, Wallowa-Whitman NF. Previously reported incident. Twenty-nine miles east of Joseph, OR. Timber. Moderate fire behavior with torching and short-range spotting. Structures threatened. Last report unless significant activity occurs.

**Predictive Services Discussion:** An upper level ridge of high pressure over the Great Basin and northern Rockies will continue to bring warm and dry weather to much of the western U.S. Look for winds in California and the Pacific Northwest to become onshore with a slight improvement in relative humidity. In contrast, it will remain unseasonably cold over the eastern U.S. under a broad low pressure system aloft. Widely scattered showers and thunderstorms are expected for the Four Corners states. Elsewhere, the upper Midwest and northeast U.S. will see rain, as will the mid-Atlantic through the Gulf Coast region along a frontal system.

## ON A HILLSIDE WHERE ROLLING MATERIAL CAN IGNITE FUEL BELOW

*Operational Engagement Category*

When firefighters find themselves in Watchout Situation #13, they must answer the following questions:

- Can you locate/construct a line to prevent material from rolling below? What do you call line that catches rolling material? Describe how you would construct this type of line and what factors you would have to consider (e.g., slope, fuels, etc.)
- Will you get enough warning of rolling material to prevent being hit by it? Who needs to be watching for rolling material? What kinds of warning systems could you establish?
- Can you see where any material that rolls below you goes and what it does? What can happen when material rolls out of the fire and below you out of view? What needs to be done to mitigate this danger?
- Is the area free of large amounts of flashy fuels? Review the Common Denominators of Tragedy Fires.
- Is the area free of chimneys, gullies, and steep slopes? Review the Common Denominators of Tragedy Fires.
- Do you have two escape routes so you can go either way? Talk about where your most likely escape routes and safety zones will be when you are on a hillside where rolling material can ignite fuel below.
- To reduce the risks:
  - Post lookouts.
  - Consider locating line in a defensible position.
  - Talk about steep fires where you have had material rolling out below you and how you dealt with it.
